DWIN PRODUCT CATALOG

PROFESSIONAL, CREDITABLE, SUCCESSFUL

INTRODUCTION

Beijing headquarter	2003
Manufacturing Center	Over 400,000 m ²
Employees	Over 1500
R&D personnel	Over 150

WHY CHOOSE US?

● Industry experience

DWIN was founded in 2003 at Zhongguancun, and now has become the top supplier of smart LCMs in China which has set up regional marketing and application support team in China as well as overseas countries such as Poland, Brazil and the United States so on.

● R&d capability

DWIN invests 30% of its profits in R&D each year, and owns hundreds of patents covering from ASIC architecture to application solutions.

● Manufacture ability

DWIN has built manufacturing and service base whose total factory area is about 400,000 square meters in Hunan. It covers the whole production process from glass cleaning, cutting, IC bonding, laminating and backlight assembly. The touch panel line with an capacity of 20K-30K pieces per day.

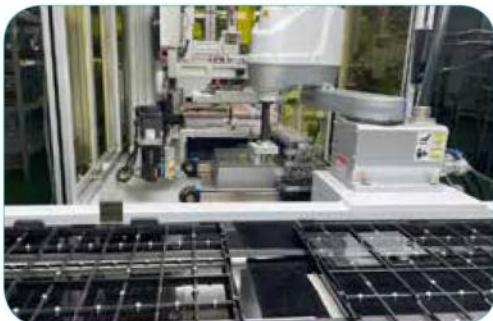

● Stable supply and price

Establish long-term cooperation with the world's leading brands with direct supply.

● Short delivery time

Greatly shorten the delivery time because of the mature industrial chain.

Comprehensive and considerate services based on the industrial chain of DWIN Hunan Science and Technology Park.

DWIN can provide timely pre-sales and after-sales services to domestic and overseas customers.

 **Overseas customer service**
The USA, Poland, Israel and other regions.

 **Headquarter—Beijing**
Located in Nation Defense Science and Technology Park, Haidian District.
Office area 2000m²

 **Manufacturing Base-Taoyuan city**
Manufacturing and service base with a building area of 400,000 m²
 **Changsha, Hunan-Changsha office**

DWIN CPU (ASIC)

T5L is a low-power, cost-effective dual-core 8051 human-machine interface dedicated ASIC designed by DWIN for AIoT application requirements. Among them, T5L1 and T5L2 were officially mass-produced in January 2019, and quickly won the favor of customers and became the new favorites in the market. In July 2020, the T5L0 of the 18bit color cost reduction program was officially mass-produced.

Category	Model	Picture	Max. Resolution		Description	Packing Qty.
			DGUS	TA		
ASIC	T5L0	 The image shows a black quad-flat-pack (QFP) integrated circuit package. The top surface has the text "T5L0" at the top, followed by "dwin.com.cn" and "BE00566.0100HG08" below it, and "2026" at the bottom right. The package has a gold-plated lead frame and a flat underside.	854*480	1024*768	DGUS II ASIC, Dual cores, built-in display buffer, 18bit RGB interface, Industrial-grade.	1000
ASIC	T5L1	 The image shows a black quad-flat-pack (QFP) integrated circuit package. The top surface has the text "T5L1" at the top, followed by "dwin.com.cn" and "AS01124HG08" below it, and "1903" at the bottom right. The package has a gold-plated lead frame and a flat underside.	800*600	1366*768	DGUS II ASIC, Dual cores, built-in display buffer, 24bit RGB interface, Industrial-grade.	1000
ASIC	T5L2	 The image shows a black quad-flat-pack (QFP) integrated circuit package. The top surface has the text "T5L2" at the top, followed by "dwin.com.cn" and "UP6320.81HG08" below it, and "1845" at the bottom right. The package has a gold-plated lead frame and a flat underside.	1366*768	1920*1080	DGUS II ASIC, Dual cores, built-in display buffer, 24bit RGB interface, Industrial-grade.	1000

T5L0 is an 18-bit low-cost version of T5L1.
1Mbytes Flash, 1Mbytes SRAM,
3Mbytes VRAM, 40nm process,
The maximum resolution is 1024*768, 18-bit color.

T5L1 and T5L2 are divided according to the different display resolutions.
Used 55nm and 40nm processes respectively to ensure the best cost performance for users.

| CPU performance

350MHz frequency dual 8051 core operation, JPEG hardware acceleration.
64-bit MDU (arithmetic unit), lower power consumption, higher cost performance.

| Display performance

200MPPS JPEG hardware decoder, 800*600 full-screen picture display only needs 5mS.
Full hardware 2D acceleration, 2.4GBytes/S video memory bandwidth, upgrade the UI from text interaction to icon and animation interaction.
The UI interface is all compressed and stored by JPEG, the storage density is increased by more than 10 times, and the storage cost is saved.

| Peripherals

Integrate 8-channel 1MSPS 12-bit AD and 4-channel 1GHz 16-bit PWM, which is convenient for touch screen, music and voice recognition applications.

The integrated long-line FSK transceiver with a rate of up to 100Mbps is convenient for remote and high-speed networking applications.

Integrate 5 full-duplex UARTs, 1 CAN interface and 20 IOs.

| Other properties

LQFP128 package, -40/+85°C operating temperature range.

1.1.2 APPLICATION GRADE DESCRIPTION

Application Grade	Explanation
Beauty Grade	Long-time outdoor use is not supported. LED lifetime is more or less than 10,000 hours.
Commercial Grade	Long-time outdoor use is not supported. LED lifetime is more or less than 10,000 hours.
Industrial Grade	Outdoor use is supported. LED lifetime is more or less than 30,000 hours. The LCDs produced in the factory will have a 15-30 days aging test.
Automotive Grade	Outdoor use is supported. LED lifetime is more or less than 30,000 hours. The LCDs produced in the factory will have 30 days aging test and 72 hours of 50° C high-temperature aging test together with conformal coating and anti-vibration treatment before leaving the factory.
Medical Grade	Outdoor use is supported. LED lifetime is more or less than 30,000 hours. The LCDs produced in the factory will have 30 days aging test and 72 hours of 50 ° C high-temperature aging test together with conformal coating and antivibration treatment before leaving the factory. EMC treatment to meet CE Class B standards.
Harsh Environment Application	Outdoor use is supported. LED lifetime is more or less than 50,000 hours. The LCDs produced in the factory will have 30 days aging test and 72 hours of 50° C high-temperature aging test. Special treatment for ESD, vibration resistance, conformal coating, outdoor application protection, etc.
COF Structure	COF is the best choice for customers who are dedicated in simple application products with the features of light and structure, low cost and easy production.

1.1.3 RELATED ACRONYMS EXPLAINATION

Type	Abbreviation	Description
shell	PS1	The plastic shell suitable for indoor use ,it may be deformed due to excessive temperature or UV degradation when outdoor use.
	PS2	The plastic shell suitable for indoor and outdoor use, undeformed at high or low temperatures, and has UV protection.
	MS1	The embedded smart screen wrapped in a stainless steel iron frame has a structure similar to a bare screen.
	MS2	The aluminum alloy shell, suitable for both indoor and outdoor environment.
Display	TN	Normal viewing angle TN process TFT display, The viewing angle is 70/70/50/70(L/R/U/D)
	EWTN	Wide viewing angle TN process TFT display, the viewing angle is 75/75/75/75(L/R/U/D)
	IPS	IPS process TFT display, commonly known as hard screen, has high contrast, good color reproduction, and wide viewing angle (typical value is 85/85/85/85).
	SFT	SFT process TFT display, with high contrast, good color reproduction, wide viewing angle (typical value is over 88/88/88/88)
Touch	R4	4-wire RTP
	R4AV	4-wire RTP with anti-glare and anti-UV, it suitable for outdoor use.
	R5	5-wire RTP
	R5AV	5-wire RTP with anti-glare and anti-UV, it suitable for outdoor use.
	CP	G+P low-cost CTP
	CG	G+G CTP, it can adjust the sensitivity of the front tempered glass or acrylic panel.
	GFF	G+FF CTP, it can adjust the sensitivity of the front tempered glass or acrylic panel.
	CGAV	G+G CTP with anti-glare and anti-UV, suitable for outdoor use. The sensitivity can be adjusted with front tempered glass or acrylic panel.
RTC	BT	Use CR3220 or CR1220 lithium electronic battery as RTC backup power source, the battery needs to be replaced after the battery life is 1-5 years (depending on the battery and the use environment).
	FC	Using farad capacitors as RTC backup power supply, it can last for about 30 days after power failure, and there is no service life problem.
Memory	1G	Built-in NAND Flash memory is 1Gbits (128Mbytes).
	2G	Built-in NAND Flash memory is 2Gbits (256Mbytes).
	4G	Built-in NAND Flash memory is 4Gbits (512Mbytes).
	8G	Built-in NAND Flash memory is 8Gbits (1Gbytes).
	16G	Built-in NAND Flash memory is 16Gbits (2Gbytes).

Type	Abbreviation	Description
Memory	4MB	Build-in Nor Flash memory is 32Mbits (4Mbytes).
	8MB	Build-in Nor Flash memory is 64Mbits (8Mbytes).
	16MB	Build-in Nor Flash memory is 128Mbits (16Mbytes).
	32MB	Build-in Nor Flash memory is 256Mbits (32Mbytes).
Brightness	A	Suffix A(for example, the selection mark is 500A) indicates that the maximum brightness of the backlight can be automatically adjusted with the change of the ambient brightness, which is mainly used for high-brightness products.
Signal interface	TTL	3.3V-5V level compatible with TTL/CMOS full-duplex UART interface, the highest rate is 16Mbps.
	232	A full-duplex UART interface that meets EIA232-F level specifications, 15KV ESD interface protection, and a maximum rate of 250kbps.
	TTL/232	3.3V-5V level compatible with TTL/CMOS/RS232 full-duplex UART interface, TTL (in-phase) or 232 (reverse) mode can be selected for each line, the maximum rate is 16Mbps
	485	A half-duplex UART interface that meets EIA485-A level specifications, 15KV ESD interface protection, and a maximum rate of 10Mbps.
	232/485	A serial port provides RS232 and RS485, but cannot be used simultaneously.
Development mode	TA	DWIN serial port instruction set UI development mode, typical operating platforms include M100/M600/K600/H600/K600+/T5UIC2, among which the L series supports high-quality music playback.
	TC	Condensed version of DWIN instruction set development mode (T5UIC1/C4) composed of a single T5 CPU.
	DGUS	DGUS UI development mode based on K600+ kernel, UI refresh cycle 200ms, support non-real-time DWIN OS.
	DGUSL	The high score simplified version of DGUS UI development mode running on T5 CPU does not support DWIN OS (T5UIC3 platform).
	DGUS II	DGUS UI development model based on DWIN T5/T5L CPU, UI refresh cycle 16-60mS, high-quality music playback, DWIN OS real-time operation, typical platforms include T5UID1/D2/D3/T5L.
User interface	10P10F	10Pin 1.0mm, FCC interface
	40P05F	40Pin 0.5mm, FCC interface
	50P05F	50Pin 0.5mm, FCC interface
	6P25P	6Pin 2.54mm, straight plug socket

Type	Abbreviation	Description
User interface	8P25P	8Pin 2.54mm, straight plug socket
	8P20P	8Pin 2.0mm, patch socket
	6P38P	6Pin 3.81mm, phoenix terminal socket
	8P38P	8Pin 3.81mm, phoenix terminal socket
	10P51P	10Pin 5.08, terminal block

6 .FASK BUS SCHEME

6.1 DWIN FSK BUS SCHEME

T5L2 + 1024*600 7.0 inch IPS LCD panel + integrated CTP

T5L2 + 1280*800 8.0 inch IPS LCD panel + integrated CTP

T5L2 + 1024*600 10.1 inch IPS LCD panel + integrated CTP

T5L2 + 1280*800 10.1 inch IPS LCD panel + integrated CTP

T5L2 + 1920*1080 13.3 inch IPS LCD panel + integrated CTP

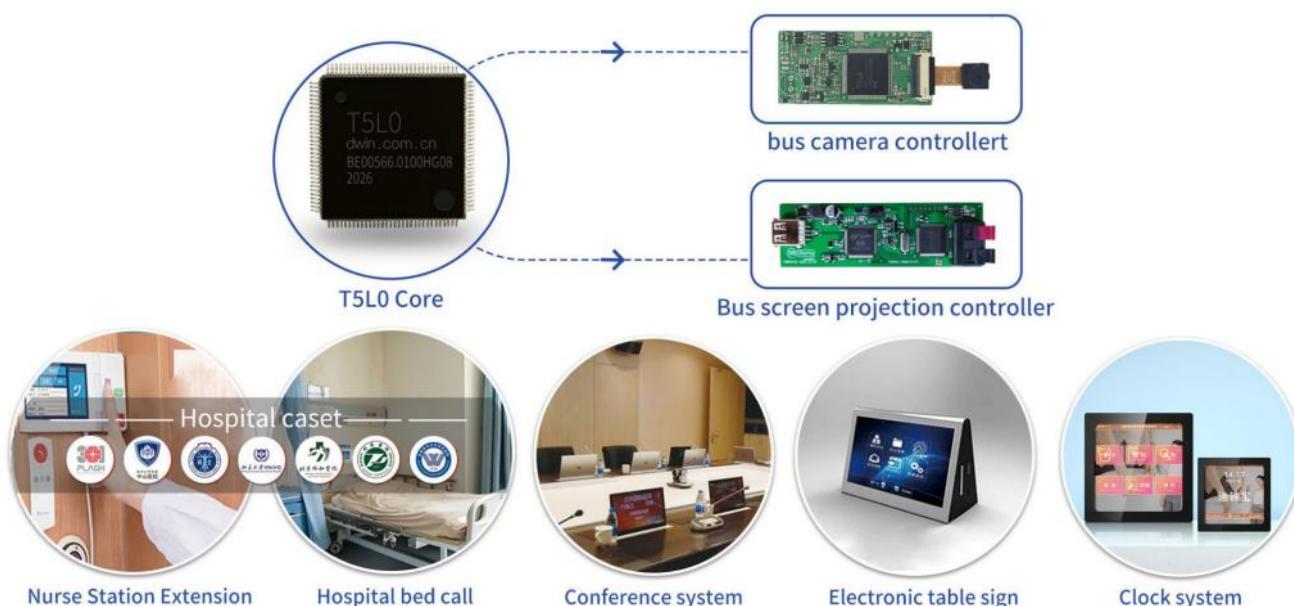

T5L2 + 1920*1080 21.5 inch IPS LCD panel + integrated CTP

The bus controller based on the T5L0 chip can convert the image signal between the USB

interface, FSK interface, VGA interface and HDM interface, which is convenient for customers to network according to the actual scene.

Advantage

- 1 Based on the FSK high-speed remote communication interface of T5L, the computer and the smart screen, the camera and the smart screen, and the smart screen and the smart screen can be linked through twisted pair cables to realize the organic networking of each endpoint.
- 2 It can realize screen projection, video intercom, video monitoring, voice broadcasting and other rich functions.
- 3 The max. bus communication rate is 35Mbps, and the 1920*1080 resolution image transmission rate can reach 16 frames per second, which makes it easy to complete video interaction.
- 4 A single bus controller supports 32 display terminals for parallel bidirectional communication, and reliable transmission of twisted pair cables up to 300 meters away.

6.2 Medical care system

T5L0 + 480*480 4.0 inch IPS LCD panel + integrated CTP

T5L1 + 854*480 5.0 inch IPS LCD panel + integrated CTP

T5L2 + 1024*600 7.0 inch IPS LCD panel + integrated CTP

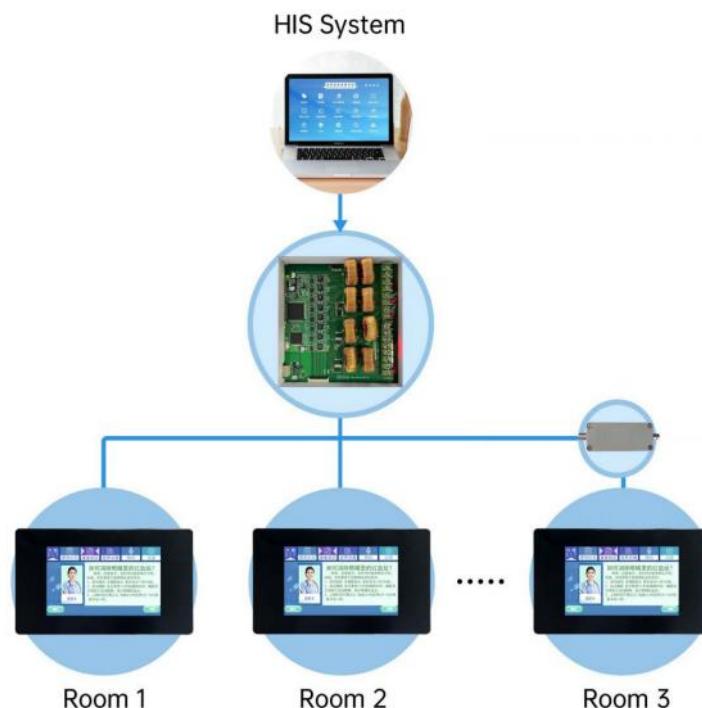

T5L2 + 1280*600 10.1 inch IPS LCD panel + integrated CTP

Based on the excellent howling suppression capability of high-speed computing T5L, it supports high-quality host broadcasting.

Remote upgrade and real-time data information, single host supports up to 256 terminals, high operating efficiency

Advantage

- 1 High-quality full-duplex voice intercom.
- 2 Double MIC, double speaker, simplify the design of the handle and external placement.
- 3 Support high-quality host broadcast to realize background music playback and TTS signal.
- 4 Files and terminal device applications can be upgraded online.
- 5 Based on a cheap twisted-pair network, simple and easy.

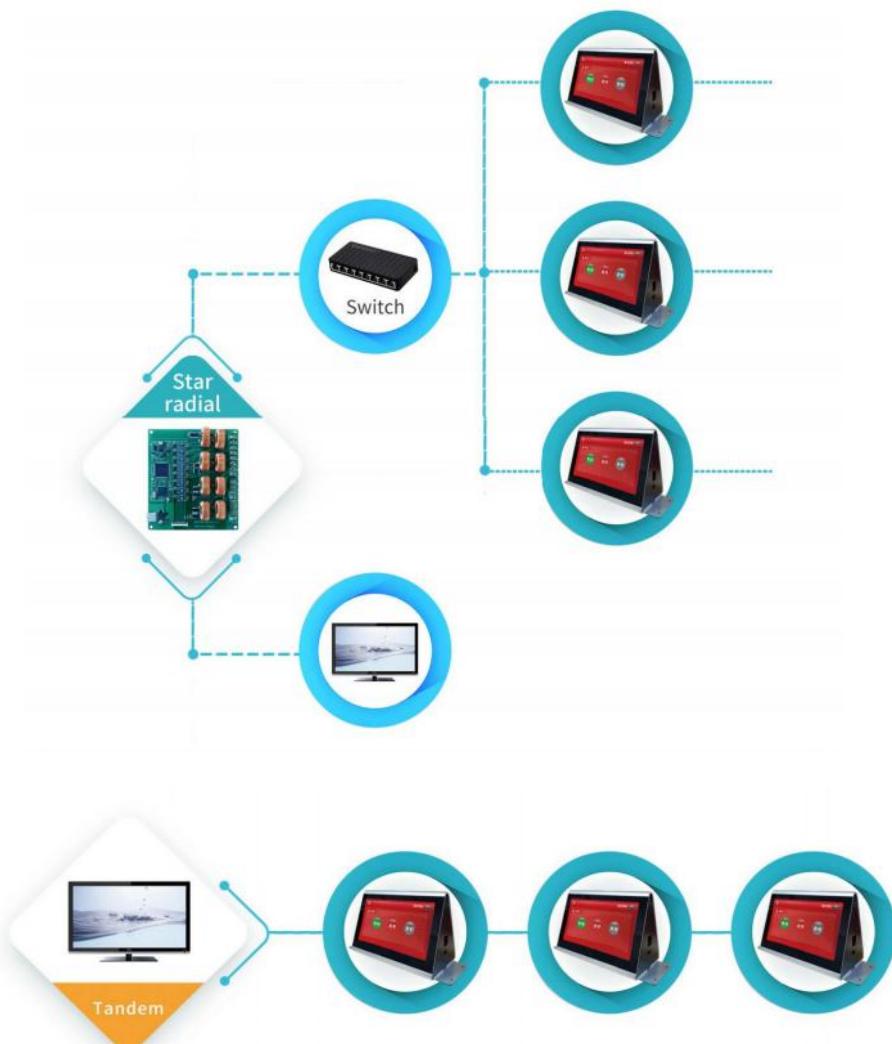

6.3 Electronic table sign

Electronic table sign is a smart color screen conference system solution developed by DWIN for the modern conference, which integrates a variety of meeting functions, has a high degree of internationalization, and enables paperless meetings, which can be used repeatedly.

Advantage

- 1 Integrate multiple functions of sign-in, voting, and call services in one.
- 2 Local area network method ensures the safety of meeting materials.
- 3 System management software for users to use directly and for easy management.

7 .LCD PANEL & TOUCH PANEL

Features

High productivity: 2.5 million pcs monthly.

High standard: 30 days charged aging, no bad pixels and full inspection

OEM A-grade glass, high-quality glass suppliers: Tianma, Innolux, Hannstar and BOE.

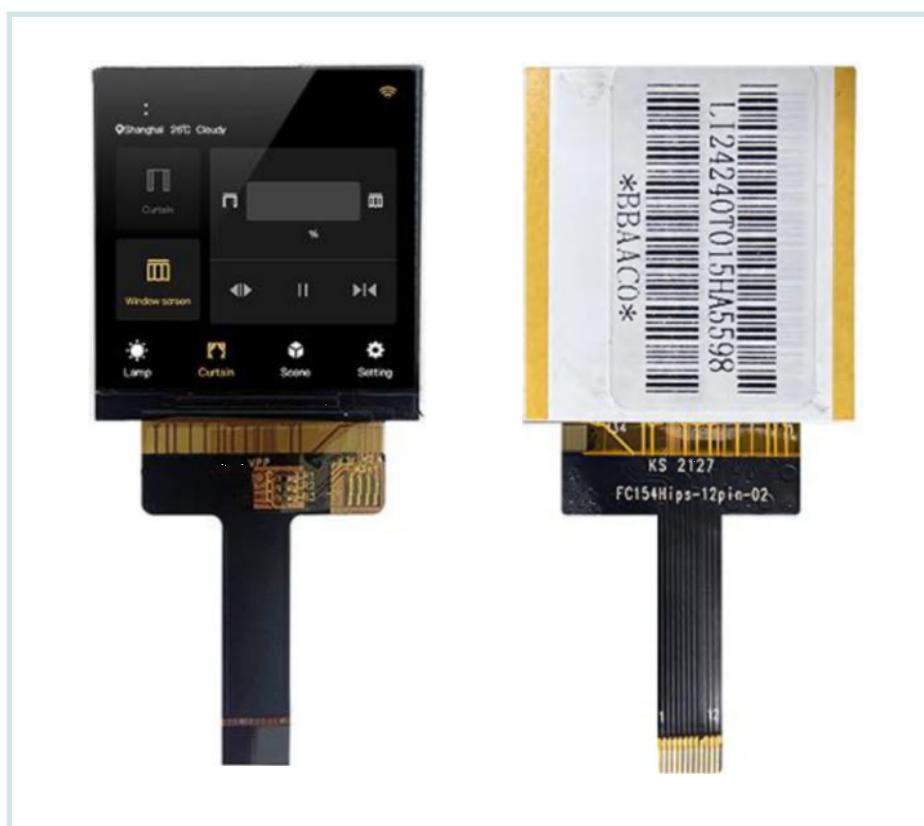

Customized service: luminance, high temperature, anti-glare, interface, cable length and cable shape etc.

Provide free technical support.
